Subject Index

A

Acetoacetate 220
Acetyzolamide lactate 212
Acidification 186
Acidosis 293
Active sodium transport 257
Activities of enzymes 239
Action potential(s) 6, 19
– threshold 132
Adaptation to low and high NaCl diets 165
Adenosine 257
Adrenalectomized rats 253
Adrenaline 71
Adrenergic beta receptor agonists 81
– mechanisms 93
– system 71
Adrenoceptor agonists/antagonists 93
Aequorin 75
Alanine 126, 190
Alcalosis 300
Aldosterone 165
Aliphatic compounds 220
Alveolar P_{CO_2} 285
Ambient temperature 126
Amiloride 165
Amino acid(s), renal reabsorption 190, 196
Aminoisobutyric acid 190
Aminopyridine 59
Amphibia 138
Angiotensin 75
Arginine-vasopressin 71
Aromatic compounds 227
Arterial smooth muscle 81
Arteriovenous anastomoses 93
ATP 257
ATPase, NaK 186
ATP content 257
Atrial and ventricular rates 341
– natriuretic substance 271
Atrioventricular block 341
Automated analysis 331
Axon 261

B

Barnacle muscle fibers 318
Batrachotoxin 55
Benzoate 227
Benzolamide 121
Beta-Agonists 81
Bicarbonate-chloride exchange 293, 300
– reabsorption 121, 186
Bioelectrical spiking activity 201
Biopotential waveforms 251
Bird osmoregulation 165
Blood-brain ECF-barrier 300
Blood flow 93, 347
– – myometrial 347
Bone 93
Brain cells 293
– extracellular fluid 300
– stem 344
Brush border 212
– – membrane 159
Butanol 55

C

Ca antagonist 49
Ca channel(s) 19, 84
Ca-deprivation 232
Ca influx 81
Ca, intracellular 261
Ca paradox 6
Ca spikes 84
Calcium 1, 201
– chelation 232
– current 30
–, extracellular 108
– indicators 75
– tolerant ventricular myocytes 6
Calibration 251
Calmodulin 277
cAMP-protein kinase 318
Capillaries 93
Carbonic anhydrase 121
Cardiac atrial tissue, natriuretic substance 271
– glycosides 108
Cardiomotor neurones 244
Carrier mediated transport 300
Catecholamines 175
Cell calcium 75
– volume 59
Central thermal adaptation 344
Cerebellar cortex 108
Chlorpromazine 318
Cinnamate 227
Citrate synthase 239
Citrulline 190
Clarke's column 99
Clearance studies 121
Cl-free solution 42
CO_2-dissociation curve 293
Cold 175
– adaptation 344
– ambient temperature 126
Collagenase 6
Collecting tubules 271
Colon 306
Conductance 59
Contractile force 49
– properties striated muscle 312
Contractility 49
Contraction 81
Contractures 42
– in intact muscle 277
Cooperativity of transmitter release 261
Coprodeum 165
Cortex 285
Corticosterone 165
Coupled sodium/hydrogen exchange 186
Crayfish muscle 261
Cross bridge 152
Cutaneous vasodilatation 115
Cyanide 326
Cyclic AMP 145
– nucleotide metabolism 162
Cycloleucine 190
Cystathionine 190
Cysteine 190
Cystine 190
Cystine/cysteine reabsorption 196

D

Deafferentation 182
Decerebrate cats 285
Deoxycholic acid 306
Dexamethasone 132
Diamide 196
Dibasic amino acids 196
Diltiazem 49
Diphenylhydantoin 318
Displacement servosystem 152
Distal tubule 138
Dog heart muscles 49
Dopamine 115
Dorsal roots 182
– spino-cerebellar tract neurons 99

E

EGTA 232
Electromagnetic blood flow measurement 93
Electromyographic activity 182
End-tidal CO_2, steps 285
Enzymes 239
Excitability of muscle 132
Excitation-contraction coupling 75
Excitatory synaptic currents (EPSCs) 1
Exercise 175
Exogenous gastrin 171
Extracellular calcium 108
– fluid 300
– fluid in respiratory acidosis 293
– pH 285
– potassium 108
Evisceration 171

F

Facilitation in crayfish 1
Fast Na channel 78
Fast/slow synaptic differentiation 261
Fast and slow twitch muscles 42
Fatty acids 306
Force-velocity relation 277
Free fatty acids 175
Freeze-rracture 145
Fructose 65
Furan 87

Subject Index

A

Acetoacetate 220
Acetyzolamide lactate 212
Acidification 186
Acidosis 293
Active sodium transport 257
Activities of enzymes 239
Action potential(s) 6, 19
– threshold 132
Adaptation to low and high NaCl diets 165
Adenosine 257
Adrenalectomized rats 253
Adrenaline 71
Adrenergic beta receptor agonists 81
– mechanisms 93
– system 71
Adrenoceptor agonists/antagonists 93

Alanine 126, 190
Alcalosis 300
Aldosterone 165
Aliphatic compounds 220
Alveolar P_{CO_2} 285
Ambient temperature 126
Amiloride 165
Amino acid(s), renal reabsorption 190, 196
Aminoisobutyric acid 190
Aminopyridine 59
Amphibia 138
Angiotensin 75
Arginine-vasopressin 71
Aromatic compounds 227
Arterial smooth muscle 81
Arteriovenous anastomoses 93
ATP 257
ATPase, NaK 186
ATP content 257
Atrial and ventricular rates 341
– natriuretic substance 271
Atrioventricular block 341
Automated analysis 331
Axon 261

B

Barnacle muscle fibers 318
Batrachotoxin 55
Benzoate 227
Benzolamide 121
Beta-Agonists 81
Bicarbonate-chloride exchange 293, 300
– reabsorption 121, 186
Bioelectrical spiking activity 201
Biopotential waveforms 251
Bird osmoregulation 165
Blood-brain ECF-barrier 300
Blood flow 93, 347
– – myometrial 347
Bone 93
Brain cells 293
– extracellular fluid 300
– stem 344
Brush border 212
– – membrane 159
Butanol 55

C

Ca antagonist 49
Ca channel(s) 19, 84
Ca-deprivation 232
Ca influx 81
Ca, intracellular 261
Ca paradox 6
Ca spikes 84
Calcium 1, 201
– chelation 232
– current 30
–, extracellular 108
– indicators 75
– tolerant ventricular myocytes 6
Calibration 251
Calmodulin 277
cAMP-protein kinase 318
Capillaries 93
Carbonic anhydrase 121
Cardiac atrial tissue, natriuretic substance 271
– glycosides 108
Cardiomotor neurones 244
Carrier mediated transport 300
Catecholamines 175
Cell calcium 75
– volume 59
Central thermal adaptation 344
Cerebellar cortex 108
Chlorpromazine 318
Cinnamate 227
Citrate synthase 239
Citrulline 190
Clarke's column 99
Clearance studies 121
Cl-free solution 42
CO_2-dissociation curve 293
Cold 175
– adaptation 344
– ambient temperature 126
Collagenase 6
Collecting tubules 271
Colon 306
Conductance 59
Contractile force 49
– properties striated muscle 312
Contractility 49
Contraction 81
Contractures 42
– in intact muscle 277
Cooperativity of transmitter release 261
Coprodeum 165
Cortex 285
Corticosterone 165
Coupled sodium/hydrogen exchange 186
Crayfish muscle 261
Cross bridge 152
Cutaneous vasodilatation 115
Cyanide 326
Cyclic AMP 145
– nucleotide metabolism 162
Cycloleucine 190
Cystathionine 190
Cysteine 190
Cystine 190
Cystine/cysteine reabsorption 196

D

Deafferentation 182
Decerebrate cats 285
Deoxycholic acid 306
Dexamethasone 132
Diamide 196
Dibasic amino acids 196
Diltiazem 49
Diphenylhydantoin 318
Displacement servosystem 152
Distal tubule 138
Dog heart muscles 49
Dopamine 115
Dorsal roots 182
– spino-cerebellar tract neurons 99

E

EGTA 232
Electromagnetic blood flow measurement 93
Electromyographic activity 182
End-tidal CO_2, steps 285
Enzymes 239
Excitability of muscle 132
Excitation-contraction coupling 75
Excitatory synaptic currents (EPSCs) 1
Exercise 175
Exogenous gastrin 171
Extracellular calcium 108
– fluid 300
– fluid in respiratory acidosis 293
– pH 285
– potassium 108
Evisceration 171

F

Facilitation in crayfish 1
Fast Na channel 78
Fast/slow synaptic differentiation 261
Fast and slow twitch muscles 42
Fatty acids 306
Force-velocity relation 277
Free fatty acids 175
Freeze-rracture 145
Fructose 65
Furan 87

G

Gastrin 171
Gastrocnemius muscle 99
Gastrointestinal tract 171
Glass microelectrodes 156
Glial cells 293, 300
Glomerular filtration rate 271
Glucocorticoid 132
Gluconeogenesis 126
D-glucose intestinal transport 253
– uptake 253
Glucose 126, 175
– absorption 253
– transport 65
Glycerinated dog heart muscles 49
Glycocalix 19
Guinea pig placenta 326

H

Hamburger shift 293
Heart 6, 30
– muscle 162
– rate 244
Hill's equation 312
Hind limb muscles 182
Histochemical analysis 312
Histochemistry 312
DL-homocysteic acid 244
Hyaluronidase 6
3-Hydroxybutyrate 126, 220
Hyperpolarizing response 59
Hypertonic solutions 65
Hypothalamic thermal stimulation 115

I

Imipramine 318
Inactivation 30
Inorganic phosphate 326
Intercellular channels 285
Intestinal epithelia 257
– epithelium 65, 257
– glucose absorption 253
Intestine 165
Intracellular buffer 293
– Ca concentration 261
– Ca uptake 81
– calcium 6
Intramembrane particle aggregates 145
Iodoacetate 326
Ionic channels 331
– selectivity 87
Ionophores 87
Isocitrate dehydrogenase 239
Isolated arteries 81
– bovine ventricular myocytes 30
– epithelia 165
– frog ventricle 162
– heart cell 19
– renal brush border membrane 159
Isoprenaline 81, 93
Isoproterenol 145

K

K-channel 19
K-contractures 42
K^+ currents 55
K^+-undershoot 108
Ketone bodies 126
Kidney 138, 212, 271
–, amino acid transport 190, 196
–, control of gastrin uptake 171
–, enzyme activities 239
–, monocarboxylic transport 220, 227
KSCN 253

L

D-Lactate 212, 227
– transport 220
Lactic acid 175
Length threshold 204
Li^+-selective ionophores 87
Li^+-transport in vivo 87
Lipid bilayers 87
Low-capacitance glass microelectrodes 156
Lower brain stem 344
– intestine 165
Loop of Henle 239
– – – fluid absorption 271

M

Magnesium 1, 78
Mannitol 65
Maternal border of placenta 326
Mechanical stimulation 59
Mechanoreceptor 59
Medullary extracellular pH 285
Membrane potential 42
– of squid giant axons 59
– -transport 87
– vesicles 253
Metabolic alcalosis 300
– inhibitors 326
Metabolism of NAD 159
Methionine 190
Methoxamine 93
Mg channel 78
Mg^{2+}-dependent protein phosphatase 318
Mg^{2+} ions 1
Microcalorimetry 186
Microelectrode(s) 19, 156
– voltage clamp 30
Microperfusion 121, 190, 196
Micropuncture 121
Microspheres 93
Microvillous membrane vesicles 253
Miniature end-plate potentials 251
Model membranes 87
Monocarboxylic acids 212, 220, 227
Mucus secretion 306
Muscle 78, 261, 312
– contraction 152
– excitability 132
– fibre(s) 42, 152, 318
– stretch 99
Myocytes 6, 19
Myometrium 232

N

Na channel 19, 78
Na-free solution 42
Na inactivation curve 78
Na potential 232
Na spikes 84
NaCl excretion 271
NaCl transport 165
Na^+ channel 55
Na^+-dependence 212
Na^+-dependent transport 220
$(Na^+ + K^+)$-ATPase 186
NaSCN 253
NAD metabolism 159
Natriuresis 271
Natriuretic substance 271
Nephrectomy 171
Nephron segmentation 239
Nerve membrane 55
Neurones 244
Neuropeptide 347
Neurophysiological studies 251
Neurotransmitter release 1, 261
Neutral amino acids 190
Nicotinic acid 227
Noise 331
Noradrenaline 71, 93
Nucleus ambiguus 244

O

Oesophageal striated muscle 312
Oenanthotoxin 55
Oocytes 84
Osmolality 306
Osmoregulation 165
Ouabain-insensitive Na efflux 318
Ouabain-sensitive pump 65
Ovarian oocytes 84
Oxoglutarate dehydrogenase 239
Oxygen consumption 175

P

Pancreatic B-cell 201
Parietal cortex 285
Permeability 121
pH-dependence 212
Phentolamine 93
Phenylalanine 190
Phenylephrine 75
Phloretin 212
Phosphate depletion 71
– influx 326
– transport 159
Placenta 326
Planar lipid bilayers 87
Pontine single units 344

Postdenervation hypersensitivity 182
Potassium 201
– contracture 42
– depolarization 145
–, external 318
–, extracellular 108
Preganglionic vagal cardiomotor neurones 244
Probenecid 212
Procaine 59
Programmable read only memory 251
Prolactin 165
Protein phosphatase 318
Proximal convoluted tubule 186
– tubule 212
– – of rat kidney 220, 227
Pulmonary ventilation 285
Pyrazinoate 227
Pyrophosphatase 159

R

Receptors 175
Alpha-Receptors 93
Beta-Receptors 93
Rectum 165
Red blood cells 293
Renal acidification 186
– brush border membrane 159
– control of gastrin uptake 171
– monocarboxylic transport 220, 227
– tubular transport 121
– tubule 190, 196, 212
Resistance 30
Respiratory acidosis 293
– capacity 239
– response 285
Resting potential 132
Rhythmic activity, uterus 232
Rigor 6

S

Sarcolemmal resistance 132
Semistarvation 253
Short chain fatty acids 306
– circuit currents 165
Shortening velocity 277
SH reagents 212
Signal transmission from Ia afferents 99
Single heart cell 30
– ionic channels 331
– nephron filtration rate (SNGFR) 271
Sinusoidal stretching 99
SITS 212
Skeletal muscle 132, 312
Skin 93
– blood flow 115
Slow twitch muscles 42
Small fatty acids 220
Smooth muscle 75, 81, 232, 277
Sodium action potentials 232
– channel(s) 55, 132
– dependence 326
– efflux 318
– /hydrogen exchange 186
–, inactivation curve 78
– pump in CNS 108
– reabsorption 186
– transport 257
Spindle afferents 204
Spino-cerebellar tract neurons 99
Squid giant axons 59
Starvation 253
Static stretch sensitivity 204
Steroid myopathy 132
Stretch 162
– sensitivity 204
Stretching, sinusoidal 99
Striated muscle 312
Strophanthidin 108
Substance P 347
Superfusion of cerebellum 108
Surface charge 78
Sympathetic activity 71
– constrictor fibers 115
– dilator fibers 115
Synapse differentiation 261
Synaptic facilitation 1
– transmitter release 261

T

Taenia coli 277
Temperature regulation 115, 126
Tension 49
– transient 152
Tetraethylammonium 59
Tetrahydrofuran (AS 706) 87
Tetrodotoxin(e) 19, 42, 59
Thermal adaptation 344
– stimulation 115
Thermoregulation 344
Thermoregulatory control of blood flow 93
Thyroidectomized dogs 175
Toad skin 145
Transepithelial potential 65, 138
– resistance 138
Transmural resistance (Goldfish) 65
Transport kinetics 212
Tricarboxylic acid cycle 239
Trifluoperazine 318
Triturus kidney electrical profile of distal tubule 138
True ECF 293
– plasma 293
Tubular reabsorption 190, 196

U

Unanesthetized dogs 341
Urine flow rate 271
Uterine smooth muscle 232
Uterus 347

V

Vagal preganglionic neurones 244
Vascular reactivity 71
– smooth muscle 75
Vasodilatation 115, 347
Vasopressin 145
Ventilation 285
Ventricle 162
Ventricular muscle 78
– myocytes 6, 19, 30
– rate 341
Verapamil 49
Voltage clamp 30
Volume regulation 271

W

Water permeability 145
Water transport 145

Z

Zero-current potentials 87
